

## **Countervailing Frequency Equivalents™ for the current pneumonic pandemic flu threat published for experimental use**

It is obvious that a not-so-subtle ruse that attempts to eliminate a large part of the world's population using bio-weapons disguised as vaccines is widespread. By releasing these "experimental" frequency antidotes associated with the current swine flu, we can all be better prepared for this or any future such scheme. We strongly believe that without options, there can be no change!

It is not my intent to trigger the wrath of any government entity; such as the FDA which insists that only "approved" web sites can be allowed to provide or display any information relating to any resolution to the current pandemic predicted by our US health officials; but I also believe that if information is available it ought to be provided to the public. The public, so informed, is intelligent enough to make decisions based on personal observations and cognition. With the CDC now predicting a "Third Wave" of the so-called "Swine Flu" targeting older citizens this time, we all need to be alert, and very skeptical of the government's claims.

I should let you know that these frequencies have been used with a small population, with success, to assist in the reversal of symptoms associated with verified, Tamiflu® resistant "Swine Flu". Because our data base is so small, no claims can or will be made. But if there is no other choice than to submit to an oncoming pandemic, I offer the chance for people to experiment with these frequencies that we have worked for several weeks to decode. If you choose to use these frequencies, sharing your findings would benefit all of us.

These particular frequencies are the countervailing frequencies that we believe are allied with the symptom causing proteins associated with the original pneumonic plague bacterium, *Yersinia pestis*. The frequencies have been prepared with Rife-like devices in mind. Do not use these frequencies in a BioAcoustic device. For those of you who are BioAcoustically trained, the reasons are obvious.

If these frequencies are a threat to any actual plan to use vaccines as a bio-weapon, my life and livelihood are likely in danger. I can only guess as to what is in store for our research company. My imagination ranges from extermination to adulation. Nonetheless, we believe the public has the right to this information and the right to use it if they so choose.

We have been facilitating inquiries concerning low spectrum analogue frequency-based biomarkers and how they relate to health and wellness over the past three decades. Our work is documented in over twenty books, countless publications and more than ten documentaries. I invite you to go to [www.rumormillnewsradio.com](http://www.rumormillnewsradio.com) and listen to the hour presentation that explains much more than this short article can.

It is our vision that once those who insist they are in control, muck-up the planet to the point that it is in absolute disarray, that there will be enough of us trained in this technique of frequency based energy medicine that we will be able to participate in the solutions that will begin to reestablish confidence and health to our planet.

**COUNTERVAILING FREQUENCY EQUIVALENTS™ for the 2009 THREATENED Yesinia Pestis Pathogen**

Identification	Category	Associated with	Musical Note	Frequency
Original Strain	Protein	choline, B3, chromium	D	147.07 Hz
Medieval	Protein	liver enzymes, hormones,	A#	117.72 Hz
		Influenza A		
known as pneumonic	Protein	thyroid, digestion, reproduction	C#	141.25 Hz
2009 oct-nov CDC shot	Protein	throat, vocal cords, reproduction	C#	142.78 Hz
NY strain Nasal	Protein	liver enzymes	C	131.92 Hz
Utah-Montana Nasal	Protein	energy cycle of the body	F	179.09 Hz

It is time that someone took a stand against the threat of annihilation of a large part of our world population. I provided these frequencies to the public in the hopes that such a disaster does not occur and for the reasons listed below:

1. The information supplied to us about an impending “Swine Flu” pandemic has been incredibly conflicting even from the same agencies:
  - a. The National Vaccine Information Center (NVIC) stated (October 21<sup>st</sup> 2009) that based on the US pattern of following in Australia’s footsteps concerning seasonal flu statistics, our flu season would be similar to previous years. Barbara Loe Fisher, co-founder of NVIC (National Vaccine Information Center) found no reasonable basis Obama’s (October 24<sup>th</sup> 2009) declaration of a US national health flu emergency.
  - b. May 4<sup>th</sup>, 2009 (UPI) - Janet Napolitano, US Secretary of Homeland Security, stated that “swine flu was no worse than regular flu. The global swine flu threat is receding.” While another source, US Secretary of Health & Human Services, Kathleen Sibelius, is reported to have said that the swine flu could devastate the human race.
  - c. An Austrian investigative journalist, Jane Burgemeister, filed criminal charges with the FBI against the World Health Organization (WHO) and the United Nations (UN) citing bioterrorism and attempts to commit mass murder. The charges involved contaminated bird flu vaccines, which Burgemeister claims she can show were deliberate attempts to cause and profit from a pandemic. Nothing is being done by any authority against Baxter, a company who admitted that they produced contaminated vaccines by “accidentally” adulterating the regular seasonal influenza vaccine with Avian Flu samples provided by WHO for experimentation. No explanation was offered as to how the sample got from one containment building to another containment building which the vaccines were manufacture. Potential Defendants include: US President Barack Obama; WHO Margaret Chan; US Secretary of Health & Human Services, Kathleen Sibelius; UN System Coordinator for Influenza, David Nabarro; US Secretary of Homeland Security, Janet Napolitano; David de Rothschild, banker; Werner Faymann, Chancellor of Austria; Alois Stoger, Austrian Health Minister and others who Burgemeister states created, and

belong to, an international corporate criminal syndicate which has “developed, produced, stockpiled and employed biological weapons to eliminate the population of the US and other countries for financial and political gain.”

Burgemeister charges that the possible defendants “conspired with each other and others to devise, fund and participate in the final phase of the implementation of a covert international bio-weapons program involving the pharmaceutical companies Baxter and Novartis.”

We don't know who to believe but we are more apt to believe information coming from a source that has no hidden agenda; which is the case for NVIC. In the case of Burgemeister, why would anyone take such risks unless solid and obvious evidence existed?

2. Our national media recently released information which indicates that the people mandating and recommending the “Swine Flu” inoculations hold financial interests in the companies producing and selling the vaccines. This would strongly indicate that the flu vaccine national emergency directives were/are economically motivated.

3. The alleged deplorable actions taken against one Professor Joseph Moshe, who it is said told a reporter that he was a microbiologist who had evidence for the States Attorney regarding tainted swine flu vaccine strains and a planned Ukrainian pandemic are unacceptable. The situation is shocking and appalling. Moshe claimed to have information showing that the vaccine produced by Baxter was actually designed as a bio-weapon disguised as a vaccine. It appears he was arrested and deported before he could make the information available.

The video recording, readily available, of his detainment seems impossible to have happened to those of us who believe we live in a free country. The events and information surrounding his “capture” are available on YouTube and many other sites. It is something you would expect to see in a totally tyrannical, oppressive dictatorship; not in our once beloved United States of America.

I believe the information contained in the reports and videos surrounding Moshe's capture to be true; particularly since we have received no information to the contrary. I'm reluctant to want to be a party to such treatment; yet I am a party to it if I do nothing to prevent its reoccurrence. I am ashamed that my country would treat someone this way.

4. It has been reported that Baxter BioPharma Solutions has admitted that they made a “mistake” by sending tainted vaccine materials to 18 countries. Destiny intervened when Czech laboratory personnel decided to test the vaccine, only to find that it was lethal. Many people believe that since Baxter adheres to BS3 bio-safety levels, no such “mistake” could have been accidental! Reports about the incident claim that “such a monumental screw-up was totally impossible at that level. Many safety systems would have needed to be sabotaged; many key personnel would need to be bribed. It simply could not be done without direction from the inside.”

5. Daily new cases have reported that people are being maimed, crippled, handicapped and killed through the forced and blanket use of this current untested vaccine. The reports of spontaneous abortions are particularly troubling. More caution, more safety, more assurances and constructive outcomes that will encourage trust and certainly more testing needs to be done. Exploiting a trusting public for financial gain is reprehensible and indefensible. I am convinced that from our future, we will look upon these events as equal appalling as sacrificing virgins for a good crop.

6. I have evaluated the voice profiles of high ranking officials and medical authorities who are encouraging people to run out and get an unproven vaccine before they are no longer available. I am finding increasing and deepening discrepancies in what they are saying with words compared to what is being conveyed by the frequency analysis of their vocal biomarkers. This information is available to the public and can be found on our web sites.

7. The predicted Fall Season “Swine Flu” threat is likely at an end but what about the next threat/bio-weapon that will be thrust upon us? Let us stand united to rebuke “top-down” policies that are not in the best interests of the people.

Respectfully submitted,

Sharry Edwards, MEd
